

Vital treatment of the month

Medical microneedling with SkinPen Precision for targeted facial & body rejuvenation

With SkinPen Precision, the controlled and temporary creation of microchannels stimulates your body's natural wound-healing response, promoting the formation of new collagen and elastin. This triggers a natural remodeling of the skin, resulting in a younger, firmer, and more radiant complexion!

Perfect for

- acne and body scars
- fine lines and wrinkles
- rough or enlarged pores
- dull complexion
- pigmentation irregularities

The treatment takes about 40 minutes, though the duration may vary depending on the treatment area. A local numbing cream is applied beforehand. Get all the information you need in a free and non-binding initial consultation.
